FORM 9 - RESEARCH INVOLVING MAMMALIAN TUMOR CELL LINES (excluding human and NHP cell lines)

Principal Investigator Name: First M.I. Last

Protocols involving the use of poorly characterized tumor cell lines; cell lines immortalized with viral agents; and/or cell lines known to be carrying viral genomic elements or human bloodborne pathogens must be reviewed and approved by the IBC.

For protocols involving the use of well-characterized tumor cell lines known to be free of viral agents; viral genomic elements; and/or human bloodborne pathogens, this form should be submitted for awareness only. The protocol does not need to be approved by the IBC unless it also involves elements otherwise subject to IBC oversight.

Project Title:

Cell line Name
and Description:

Source (commercial vendor; researcher; etc.):

Check here if the cell line(s) is of unknown origin:

Was the cell line(s) immortalized with viral agents?: Yes No

If yes, please list the viral agents:

Does the cell line(s) contain viral genomic elements?: Yes No

If yes, please describe:

Does the cell line(s) contain human bloodborne pathogens (BBP)?: Yes No

If yes, please list the BBPs:

Work with these cell lines will be conducted at: BSL-1 BSL-2

Please describe disposal methods:

Complete this form and submit it to: ibc@uark.edu.
