

Doing Human Subjects Research?

Does your study...

- ⇒ Involve one or more human subjects?
- ⇒ Prospectively assign human subjects to interventions?
- ⇒ Evaluate the effect of interventions on the human subjects?
- ⇒ Have a health-related biomedical or behavioral outcome?

Unsure how to answer the questions? We have a tool that can help! <https://grants.nih.gov/ct-decision/>

If “yes” to ALL of these questions, your study is considered a clinical trial.
